

Viknesh Sathya – Fullstack developer (MERN)

📍 Bengaluru | 📞 +91-9597650975 | [🌐 LinkedIn](#) | [🐙 Github](#) | [🔗 Scaler](#) | [🔗 My Portfolio](#) | ✉ iamviknesh.sathya@gmail.com

SKILLS

- **Programming Languages:** Javascript,CSS,HTML.
- **Libraries and Frameworks:** React, Redux, Zustand, TanStack Query, Node.js, Express.js, NestJS, Tailwind CSS, DaisyUI, Material UI, Framer Motion, React Native.
- **Databases & Platforms:** MongoDB, Mongoose, PostgreSQL, AWS, Docker.
- **Tools & Other Expertise:** REST APIs, Postman, Clerk, Arcjet, Socket.IO, n8n, Nodemailer, Git, ngrok, GitHub, VS Code, Webpack, Parcel, npm, Figma, Mailtrap, Brevo, ImageKit, Cloudinary, SEO Best Practices, WebSockets, Responsive Design, Web Accessibility, Generative AI.

EXPERIENCE

Jan 2022 - Present

Technology Analyst
Infosys

- Delivered multiple **full-stack projects** with React frontends and Node.js/Express/NestJS backends, using **MongoDB/Mongoose and Postgres** for structured data persistence.
- Boosted query performance by ~30% through **indexing in Postgres and MongoDB**, schema optimization, and query refactoring.
- Written **DDL scripts, stored procedures, and n8n workflows with webhooks** and backend processes.
- Built **REST APIs, authentication/authorization flows, and real-time notification alerts with Socket.IO**, deploying applications with **AWS and Docker** for production reliability.
- **Led and mentored teammates** in development best practices, improving collaboration, code quality, and delivery speed.

PROJECTS

SecureGate (Authentication & Access Control System)

🔗 <https://securegate-5wv8.onrender.com/>

- Built a **JWT-based authentication system** with login, logout, forgot/reset flows, and **protected routes with email verification**, achieving **100% coverage of secure user actions**.
- Secured credentials using **bcrypt hashing** and integrated **nodemailer with Mailtrap/Brevo + custom templates**, ensuring reliable email delivery with a **95%+ success rate**.
- Implemented backend tracking of **join dates and last login entries** for full auditability, while following best practices in middleware, error handling, and environment hygiene.
- Delivered a responsive frontend with **React, TailwindCSS, and Framer Motion**, combining smooth animations with ~20% faster interaction latency.
- **Tech Stack:** Node.js, Express, MongoDB Atlas, Mongoose ODM, JWT, bcrypt, nodemailer, Mailtrap, Brevo, React, TailwindCSS, Framer Motion.

Natours (FullStack Tour Booking Application, SSR)

🔗 <https://natours-4fdk.onrender.com/>

- Built a **server-side rendered Node.js + Express application** with **JWT auth, bcrypt hashing, and role-based access**, securing all user and admin operations.
- Implemented **Stripe-based tour bookings**, reviews, and optimized APIs using **query middleware, aggregation pipelines, and pagination**, improving response times by ~25%.
- Integrated **Multer + Sharp** for secure image uploads and compression, reducing file sizes by ~40% while maintaining quality.
- Followed clean **MVC architecture** with centralized error handling, environment-based configuration, and production-grade security (Helmet, rate limiting, sanitization).
- Delivered responsive **Pug-based SSR pages** bundled via Parcel, with **Leaflet maps** for interactive tour locations.
- **Tech Stack:** Node.js, Express, MongoDB Atlas, Mongoose, JWT, bcrypt, Multer, Sharp, Stripe, Pug, Parcel, Helmet, Leaflet.

Talkative (RealTime Chat Application)

🔗 <https://talkative-trx6.onrender.com/>

- Built a **MERN stack chat app** with **Socket.IO** for instant messaging, online/offline tracking, and secure authentication using **JWT + bcrypt**, cookies, and protected routes, plus **Resend email flows** for signup.
- Supported **image messaging via Cloudinary** with optimized delivery, while managing client state efficiently with **Zustand**.
- Delivered polished UX through **TailwindCSS + DaisyUI**, notification sounds, and toast alerts, while hardening backend with **Arcjet security, dotenv hygiene, and morgan logging**.
- **Tech Stack:** React 19, Vite, Zustand, React Router v7, TailwindCSS, DaisyUI, Socket.IO, Node.js, Express, MongoDB, Mongoose, JWT, bcryptjs, Cloudinary, Resend, Arcjet.

BlogNest (FullStack Blogging Platform)

🔗 <https://blog-nest-sepia.vercel.app/>

- Built a modern blogging app with **Clerk authentication and role-based access control**, restricting sensitive features to verified admins and authorized users.
- Enhanced frontend performance by ~30% using **TanStack Query** for efficient mutations, optimistic rendering, and **React Router v7** for seamless navigation, while integrating **ReactQuill rich text editor** with trending, popular, and featured posts powered by backend analytics.
- Implemented **infinite scrolling, optimized image handling with ImageKit**, and structured persistence with **Mongoose ODM on MongoDB Atlas**, improving scalability and engagement.
- **Tech Stack:** React 19, TailwindCSS, Clerk, ReactQuill, TanStack Query, React Router v7, ImageKit, Node.js, Express, MongoDB Atlas, Mongoose.

ACHIEVEMENTS

Honored with the **INSTA Award four consecutive times** for outstanding contributions to project success and delivery excellence.

EDUCATION

Scaler

2024

Specialized in Software Development & Problem Solving

SaranathanCollege of Engineering

2020

BE - Bachelor of Engineering
