Viknesh S – Fullstack developer (MERN)

Bengaluru | +91-9597650975 | Linkedin | Github | Scaler | My Portfolio | iamviknesh.sathya@gmail.com

SKILLS

- MERN (MongoDB, Express.js, React, Node.js), SQL (PostgreSQL, Prisma), NoSQL (MongoDB, Mongoose ODM), JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Zustand, REST APIs, Socket.IO, Nodemailer, Multer, Sharp, TailwindCSS, DaisyUI, Framer Motion, Pug, Parcel, NestJS, AWS, Docker, Git, Postman, DBeaver, n8n, Arcjet, rate limiting, input sanitization, centralized error handling, morgan, Generative AI (Claude, Copilot)

EXPERIENCE (4+ years)

Technology Analyst **Aug 2025 - Present**
Infosys

- **Delivered an end-to-end permits and licensing solution** for a Nevada client using NestJS, Node.js, PostgreSQL, and React, reducing manual processing and enabling scalable, auditable workflows.
- **Implemented secure authentication and dynamic forms** with JWT, bcrypt, and middleware, integrating Form.io and ReactQuill for configurable rich forms and achieving 100% compliance with enterprise security standards.
- **Improved performance and observability** by boosting query performance by ~30% through indexing, schema optimization, and query refactoring, and managing database design and maintainability with DBeaver.
- **Automated approvals and productionized delivery** by building n8n workflows and webhooks, validating APIs with Postman, deploying services on AWS with Docker for reliability and CI/CD efficiency, and **mentoring teammates** to improve collaboration and delivery speed.
- **Tech Stack:** NestJS, Node.js, PostgreSQL, React, Form.io, ReactQuill, JWT, bcrypt, Socket.IO, n8n, DBeaver, Postman, AWS, Docker, Git

Senior Systems Engineer **Jan 2022 - Aug 2025**
Infosys

- **Maintained and enhanced** an existing MERN-based web application for a Canadian client, consolidating multiple codebases into a unified platform and strengthening authentication flows with **JWT, bcrypt, and role-based access**.
- **Implemented new features** such as automated email notifications using **Nodemailer with custom templates**, improving communication workflows and boosting user engagement by ~30%.
- **Optimized backend performance and reliability** by refactoring NoSQL queries with aggregation pipelines and indexing (cutting API latency by ~20%), and enforcing clean MVC architecture, centralized error handling, and production-grade security practices (Helmet, rate limiting, sanitization), reducing downtime incidents by ~15%.
- **Accelerated delivery** by leveraging **Generative AI tools (Claude, Copilot)** for boilerplate code, saving ~25% developer time on repetitive tasks.
- **Tech Stack:** MongoDB, Express.js, React, Node.js, JWT, bcrypt, Nodemailer, Multer, Sharp, Helmet, Generative AI (Claude, Copilot).

PROJECTS

SecureGate(Authentication & Access Control System)
https://securegate-5wv8.onrender.com/

- **Built and secured authentication**: Implemented a JWT-based system with login, logout, forgot/reset flows, protected routes, and email verification; secured credentials with **bcrypt** and integrated **Nodemailer** (Mailtrap/Brevo) with custom templates, achieving 100% coverage of secure user actions and a 95%+ email delivery success rate.
- **Auditability and backend hygiene**: Tracked join dates and last-login entries for full auditability while enforcing middleware best practices, centralized error handling, and strict environment hygiene.
- **Responsive frontend and performance**: Delivered a responsive **React** frontend styled with **TailwindCSS** and animated with **Framer Motion**, producing smooth UX and ~20% faster interaction latency.
- **Tech Stack:** Node.js, Express, MongoDB Atlas, Mongoose ODM, JWT, bcrypt, Nodemailer, Mailtrap, Brevo, React, TailwindCSS, Framer Motion

Natours (FullStack Tour Booking Application, SSR)
https://natours-4fdk.onrender.com/

- **Built and secured** a server-side rendered **Node.js + Express** application (MongoDB Atlas, Mongoose) with **JWT** authentication, **bcrypt** hashing, and role-based access for users and admins, ensuring 100% secure operations.
- **Implemented bookings, reviews, and media handling**: integrated **Stripe (payment processor)** for tour bookings/reviews and optimized APIs with query middleware, aggregation pipelines, and pagination (≈25% faster responses); added **Multer + Sharp** for secure image uploads and compression (≈40% smaller files) while enforcing clean MVC, centralized error handling, and production-grade security (Helmet, rate limiting, sanitization).
- **Delivered responsive SSR frontend** using **Pug**
- **Tech Stack:** Node.js, Express, MongoDB Atlas, Mongoose, JWT, bcrypt, Multer, Sharp, Stripe, Pug, Parcel, Helmet, Leaflet

Talkative (RealTime Chat Application)
https://talkative-trx6.onrender.com/

- **Built a MERN chat app** with **Socket.IO** for real-time messaging and online/offline presence; implemented secure authentication using **JWT + bcrypt**, cookies, protected routes, and **Resend** email flows for signup.
- **Enabled rich media and client performance**: supported image messaging via **Cloudinary** with optimized delivery and managed client state efficiently with **Zustand**; delivered a polished UI using **TailwindCSS + DaisyUI**, with notification sounds and toast alerts.
- **Hardened backend and observability**: applied Arcjet security measures, strict **dotenv** environment hygiene, and **morgan** logging; enforced middleware best practices and centralized error handling for reliability and auditability.
- **Tech Stack:** React 19, Vite, Zustand, React Router v7, TailwindCSS, DaisyUI, Socket.IO, Node.js, Express, MongoDB, Mongoose, JWT, bcryptjs, Cloudinary, Resend, Arcjet.

ACHIEVEMENTS

Honored with the **INSTA Award 4 consecutive times** for outstanding contributions to project success and delivery excellence.

EDUCATION

Scaler (Specialized in Software Development & Problem Solving) **2022**
Saranathan College of Engineering (BE - Bachelor of Engineering) **2020**
